2007 Technology at 2003 Prices!

Dear Customer

Please find enclosed a copy of our new leaflet promoting the most popular 15 tools from the Dotco range.

Meister Abrasives have been at the cutting edge of the supply, servicing and repair of Dotco Pneumatic Tools for over 20 years. To ensure we maintain this position we have recently carried out an analysis of our top selling tools. From this review we have decided to focus attention on our top selling 15 tools by increasing our stock levels and offering reduced prices, which are equal to 2003 list prices.

The attached leaflet details the tools concerned and our new improved prices.

Contact us now for more information about the high quality Dotco range or to place your order for next day delivery.

COOPER Power Tools

MEISTER ABRASIVES PNEUMATIC TOOLS

Meister Abrasives now offer not only a comprehensive range of pneumatic tools but it is offering 15 of its best sellers at new incredibly competitive list prices (see inside). We consider we are raising the standards of practice in the pneumatic tool maintenance industry by investing heavily in both hardware and software for its Pneumatic Tool Unit (PTU). Through the PTU we can offer regular servicing, training or differing levels of complete maintenance programmes to suit customer needs and budgets. Our Daventry facility provides customers with state of the art tool condition analysis techniques. Meister has developed its own in house tool condition assessment - Master Air Tool Condition Assessment Standard (MATCAS). This assessment uses complex software to review the overall tool condition of a rotary tool rather than simply checking vibration levels, thus providing data for controlled servicing and maintenance to be undertaken. This information is recorded into a comprehensive database to enable a complete history of individual tools to be developed. The MATCAS database is used as part of a systematic recall of tools for assessment and servicing. We can develop a package to suit your needs! For further information on all of our products and services contact
