Brake Truing Device

Dressing made easy!

Designed for truing and dressing diamond and CBN wheels quickly and effectively with minimal superabrasive loss.

The brake truing device uses a silicon carbide abrasive wheel to dress larger resin bonded diamond and CBN wheels – the engineered braking system ensures a well trued and dressed wheel.

Description

Master Brake Truing Device is suitable for dressing most types of resin and metal bonded superabrasive wheels.

Availability

Product code: 01053891

Supplied with a silicon carbide truing wheel, size 80 x 25 x 12.7mm. Three standard specifications of truing wheel to choose from:

- GC46 M5 V4 - for grit sizes D/B91 to D/B181
- GC60 L5 V4 - for grit sizes D/B64 to D/B126
- GC80 K5 V4 - for grit sizes <D/B64

Replacement grinding wheels and service kits for the Brake Truing Device also available.

Features

- Robust design for accurate truing and a long life
- Bi-directional design allowing the device to be mounted in any orientation

Applications

Designed for truing diamond and CBN wheels quickly and effectively with minimal superabrasive loss.
