

MASTER[®]

Dressing Stones

Master dressing stones are manufactured from high-purity white aluminum oxide abrasive and are designed for dressing superabrasive Diamond and CBN resin bonded wheels.

The frequent use of the correctly chosen dressing stone enables optimised wheel life, resulting in consistent grinding and minimal heat generation.

Availability

The stones are available from stock in our standard size of **100 x 25 x 12 mm**, in a **square** shape.

Master Superfinishing stones are available in five different grades, from coarse to very fine, all available from stock.

Stocked range

Code	Description	Wheel mesh size (FEPA)
01045387	STONE 100 X 25 X 12 COARSE [RED]	126 - 181
