

# MASTER ABRASIVES

Safe Use of Abrasives  
training course

**It is a requirement of the Provision and Use of Work Equipment Regulations (PUWER) that all people who use, supervise or manage the use of work equipment have received adequate training.**

**Master Abrasives offer a solution to ensure this requirement is covered for employers, helping to keep their workforce safe; the safe use of abrasives training course.**

## Topics

The safe use of abrasives course covers the following topics:

- PUWER 1998
- Regulatory bodies involved in abrasive safety
- What to consider when ordering a wheel
- Wheel marking system & requirements
- Wheel mounting
- Machine guards
- Storage and handling
- Personal protective equipment - PPE
- An introduction to legal requirements
- BAF general safety recommendations for the use of abrasive wheels
- Publications available from BAF

The programme can be tailored to your specific needs and can even be expanded to include application recommendations for abrasives to improve your performance.

## Accreditation

The safe use of abrasives training course is accredited by the British Abrasives Federation.
